

Enhanced Compliance

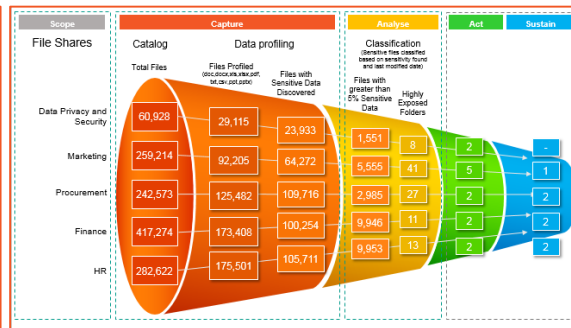

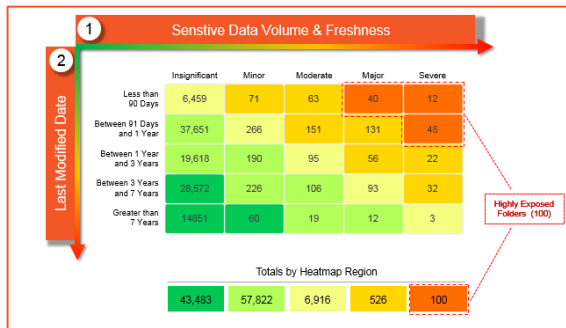

- Better understanding of PII / PCI locations and flows
- Minimised likelihood of breaches incurring penalties of up to \$1 million for a data breach

Business Challenges

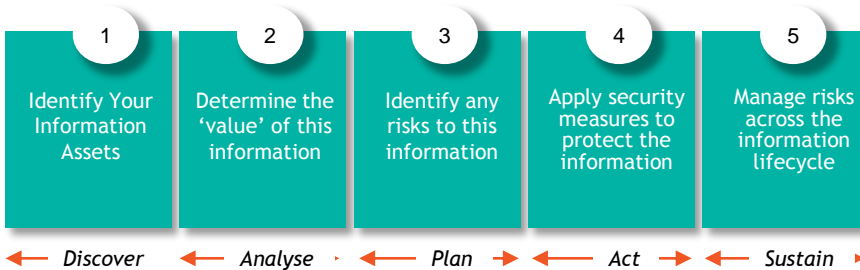

- The client needed to understand where its sensitive data assets are located in order to; optimise control decisions, reduce risks of sensitive data exposures and improve sensitive data awareness.
- They wanted to take a proactive approach to understand where their Sensitive Data (PII, PCI, PHI) is located and being used across unstructured file systems.

Our Solution

InfoCentric engaged to provide a privacy exposure assessment over 4 weeks to scan 5 complex file share repositories. The team used a leading security and risk software to expedite. Scope included: Catalog and profile the 5 nominated network shares for sensitive data (PII, PCI & PHI)
Key Findings: Out of ~600,000 files scanned 32% contained sensitive data.

RECOMMENDED DATA SECURITY RISK PROFILING APPROACH

Business Benefits

- ✓ Increased visibility into the Department's sensitive data landscape
- ✓ Optimised decisions relating to controls, reduced risk of sensitive data exposures.
- ✓ This activity will also provide longer term opportunities to perform consolidation, de-identification and further reduce risk.
