

Digital Health Platform helped the Insurance Organisation to boost customer engagement and customer satisfaction.

### Business Challenges

- Simplify the achievement/goal structure for making it easier for customers to track their insurance premium
- Uplift customer engagement by employing a simplified user interface
- Usher in an intuitive and functional responsive website that will enable all customers the ability to track and monitor, provide insight into what further activity is needed in order to meet long term targets, run daily reports on customers activation status, challenge activity and goal achievements

### Our Solution

InfoCentric helped the client by developing a digital platform for the collection of the customer data and provided real-time data integration and analytics solutions to get better insights for their customer base as well as managed services for seamless operations of this innovative program.

- ▶ Web service, API integration of 3 wearable devices
