

Rapid data analytics solution helped the client organisation to generate insight quickly saving time and effort.

Business Challenges

- Leading NSW University is in the process of implementing a new Research Management System.
- They needed a flexible reporting solution to allow end-users and Administrators to “slice and dice” research data for further analysis.
- High Priority need for a quick Reporting and Analytics environment.
- Lack of better visibility of the Research and Publication data and lack of trust in the data due to multiple anomalies
- Slow access to required insight using legacy technology
- Small and overloaded Reporting team
- Need for a Self Service Analytics, reliable data storage and analytics environment and self sufficient, automated and intelligent analytics solutions

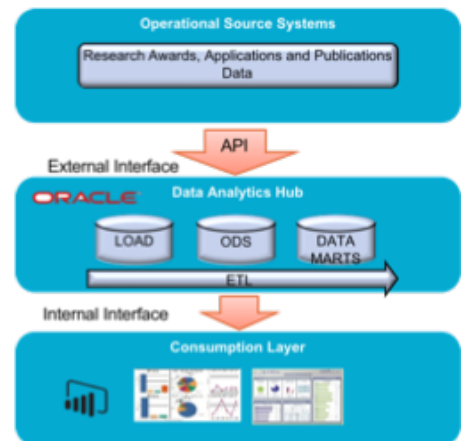

- *Delivered 20+ Business Reporting Requirements, 50+ Business Insights in 4 Dashboards*
- *Multiple insights and business queries answered in each reports*
- *Ability to analyse data for 50 + Dimensions and 12 Measures from aggregate to transactional level*
- *Historic data reporting for 10+ years of data*

InfoCentric's Approach

Our Solution

InfoCentric helped the client by delivering a Rapid Data Analytics solution using Oracle 12c and Microsoft Power BI in 4 months to cater for all High Priority University's Research Analytics and Financial Reporting.
